

Dear Commission,

I would ask that the LPFM stations would NOT be able to take priority over national stations such as K-Love.

K-Love is providing excellent programming that reflects American family friendly values and positive, encouraging music.

K-Love is self funded with donations from the private sector. Public money is not used by K-Love in it's production of programming. Therefore, K-Love is in the areas where people want it, because they same people are supporting it financially out of their own private resources.

K-Love benefits not only Omaha/Lincoln Nebraska, but many, many other communities by giving it's radio audience the choice to not only listen, but to support the stations. Very rarely is there a radio station that has the ability, driven by the listens, to broadcast programming that is not morally confusing. I think the outrage from the Superbowl is an example of what happens when a network is allowed to push their garbage, disguised as programming, on the American public. K-Love is the opposite, in that they are giving a positive message to people who want to hear it all over the nation.

Thank you,
Wade Schmucker
